PHOTOGRAPHIC INTERPRETATION PRODUCTION BOARD

Minutes 8 February 1967

Present:

STAT

Mr. Brugioni

STAT
STATA. Approval of Minutes

The minutes of 4 January 1967 were approved as written with the following clarification made in para 2, page 1: The "dirty" copy is not quite as good in quality as the regular copy. This clarification brought the question from Mr. Brugioni as to the cost of the "dirty" copy. A long discussion ensued on this aspect and it was pointed out that [redacted] was preparing a paper for [redacted] which would point out the various aspects of the procedure of requesting the "dirty" or preliminary copy of film.

STAT
STATB. New Business:Recommendation for Recall of KH-7 & 8 Photo Coverage

[redacted] CSD, reviewed the present methods available for recall of satellite photography and indicated the time which was involved; then presented a proposal for a new procedure. Essentially the procedure involved the use of the TID base plots, the aerial photo negative camera (CPIA), and the minicard system.

STAT

A review of the current backlog of KH-7 & 8 photography, as applied to a CSD time study of the proposed procedure, estimated CSD could eliminate the backlog in 43.8 actual working time in days. (29 KH-7 & 3 KH-8 missions are backlogged) Of interest was the estimate that the 45 minutes needed under present condition to search for a prior target photo coverage could be reduced to approximately 2 minutes per target.

[redacted] listed the advantage of his proposal as:

TALENT-KEYHOLE

CONTROL SYSTEMS. ON New Business (cont'd):

- 1) All necessary materials for implementation are available including mission plots and film
- 2) No machine program would be necessary
- 3) No photo lab assistance required
- 4) Simplicity of input
- 5) Multiple retrieval parameters
 - WAC Area
 - Coordinate Area
 - Msn date/time frame
- 6) Good output flexibility
- 7) Compatibility

After discussion it was asked that Production Board members be prepared to present any further comments, suggestions, and/or concurrence at the next meeting. At this time guidelines for implementation would also be discussed.

C. Other Business:

[] announced that the remaining items on the agenda would be deferred until the next meeting. It was requested under item 6 of the agenda that all members be prepared to brief on various building activities relative to future planning for the JIIRG.

STAT

As a result of individual problems the scheduling for the regular meeting time of the Production Board was reviewed subsequent to the meeting. A consensus indicates 1500 hrs. on Thursday as the most desirable time for future Production Board meetings.
